

EDUCATION

B.Tech, Computer Science & Engineering

Amiraj College Of Engineering And Technology  
2019 - 2024  
CGPA: 7.10/10

WORK EXPERIENCE

Python Development

Arihant AI, Ahmedabad  
Internship • Feb 2023 - Aug 2023 (6 months)  
Internship with Arihant AI as a Python developer, I worked with an Odoo-based framework. I automated tasks, integrated the frontend with database actions for dynamic websites, and developed email templates for automated sending at scheduled times.

Web Development

Infolabs, Virtual  
Internship • Mar 2022 - Apr 2022 (1 month)  
During my internship, I used Django to create a dynamic website, working with APIs, Bootstrap, HTML, and CSS. By the end, I successfully built the website myself and completed my internship with a project submission.

PROJECTS

Weather App using Python(Django)

Mar 2023 - May 2023  
I developed a dynamic web application by integrating WeatherAPI to fetch live weather data. I utilized Bootstrap for responsive and aesthetically pleasing templates, ensuring the frontend was user-friendly and modern. For the backend, I implemented logic using Python, allowing for efficient data processing and real-time updates. This combination of technologies provided a seamless user experience, with real-time weather information displayed in a visually appealing format.
