

EDUCATION

B.Tech, Computer Science & Engineering

Amiraj College Of Engineering And Technology
2019 - 2024
CGPA: 7.11/10

Senior Secondary (XII), Science

R D School Of Science
(GSEB board)
Year of completion: 2019
Percentage: 65.88%

WORK EXPERIENCE

Odoo Development

Arihant AI, Ahmedabad
Internship • Feb 2023 - Aug 2023 (6 months)
During my internship, I gained hands-on experience in industrial database management, implementing ORM methods with Python for data automation. I also developed websites using the Odoo framework with HTML5, CSS3, JS, and Bootstrap.

POSITIONS OF RESPONSIBILITY

I collaborated on a two-person project, functioning as an assistant, supporting my colleague by leveraging the knowledge acquired during my internship.

PROJECTS

Web Development using Python and Django Framework

Feb 2024 - May 2024

As part of my academic projects, I developed a News Website using a Bootstrap template as the foundation. This website utilized a News API for live updates, ensuring the content remained current and engaging for users. The backend logic was implemented using Python with the Django framework, providing a robust foundation for handling routing, database management, and template rendering. Additionally, I customized the front-end with modifications to fonts, design elements, and color schemes to enhance the user experience and align the website with desired aesthetics. This project allowed me to gain practical experience in web development, including integrating APIs, utilizing backend frameworks, and refining front-end design for optimal usability.
